1 Interview 2 Script

Checking the participants awareness of their security

1. What did you think was the most important part of your account ecosystem?
2. Are you aware of any account security vulnerabilities you may currently have?
3. Which of your account(s) do you think are the most important to keep secure?
4. Are you aware of anything you can do currently to improve your account security?

Reflections

1. Were there vulnerabilities found within the analysis based on a security practice that you originally thought secure?
2. Are there any practices you currently do you thought were not secure but disproved by the analysis?
